Programme Details

The One-Day State Level Awareness Programme on Stock Markets in India, Opportunities and Trends will give a bird's eye view of the functioning and the system of the Indian Stock Market to the participants. The programme will provide an opportunity to delve into the intricacies of the Stock Market, Options, Derivatives, Mutual Funds and other highly technical aspects delivered by professional experts who have deep knowledge in the field. The expert will also cover the job openings available in this area.

One of the pillars of the Indian economy is a well-functioning stock market. However, the participation of individual investors, especially the young crowd from tier II and tier III cities is poor. Such programmes will give a boost to the confidence of the uncertain and vary investors who are looking for alternative investment avenues to increase their wealth and improve their quality of life.

Programme Objectives
